

Name Layout Timeline Version

Updated by Mathias PFAUWADEL 1.1

Patch Notes

- 1.1 : Work on tab, objectPage
- 1.0 : 1st version working

To be Done

- SearchText Box
- More Options
- Filter
- Export
- Editable

Description

Allow you to display DateProperty of your objects (and their associated objects) in a Timeline. The Layout support one level of association, and the customDisplay string

Screen Shot

Style are fully customisable by CSS, you can expend/collapse the list of associated objects. You can zoom with mouse wheel and the scale time will adapt.

Node setup

On indexPage

Layout name	Timeline
Layout ID	
Custom Display String	[name] [APPLICATION_CODE]
Hidden Nodes	flux_20023_3424782033
Steps	[["application_roadmap_per_type":["steps":["name":"step1","start":"WHENCREATED","end":"GOLIVEDATE","style":"color: green; background-color: orange;"]]]]

Options

Hidden Nodes :

Set the ID of the nodes you don't want to appear in the tree, the children will be display instead. (Can be use for application flux See exemples below)

Steps

Describe your step in a json file, then minify it on <https://www.cleancss.com/json-minify/>

Here is an exemple :

```
{
  "application_roadmap_per_type": {      // node ID
    "step1": {                          //id of the step must be unique
      "name": "step1",                  // name of the step
      "start": "WHENCREATED",           // property scriptname of the start date
      "end": "GOLIVEDATE",              // property scriptname of the end date
                                          // will be set to current if the date is null
      "style": "color: green; background-color: orange;" // css style
    },
    "step2": {
      "name": "step2",
      "start": "GOLIVEDATE",
      "end": "ENDDATE",
      "style": "color: yellow; background-color: blue;"
    }
  },
  "application_20020_230578405": {
    "step3": {
      "name": "step3",
      "start": "WHENCREATED",
      "end": "WHENUPDATED",
      "style": "color: red; background-color: pink;"
    }
  }
}
```
